Hi Ryan,

For your review & use I have attached a couple of documents:

two pdf reports, one of vessels that have been reported but not yet removed (still there) and one of vessels that have been removed by an agency

one excel spreadsheet which has the same vessels as the "not yet removed" report but with additional info such as coordinates and details about the vessels. If you need additional information on any of the vessels please let me know. Note that these vessels have been reported as abandoned or derelict but they may not have been confirmed as such. I didn't filter out the vessels that are in Sector Portland's area. If you have any questions about interpreting the information let me know. The id number assigned to the vessel represents the county it was in, the year it was added to the database, and the order the vessel was entered in the database (i.e., JF10-011 was in Jefferson county in 2010 and was the 11<sup>th</sup> vessel reported).

Our IT person Tim Strickler is actively working on a mapping project this week related to the vessels so I may have some more updated coordinates for some of them by later in the week.

I will send you a separate e-mail of the vessels that aren't on the list but are likely to end up there eventually.

**Melissa Ferris**
